About

Web Developer with strong skill set in responsive front end development. Skilled in MVC Javascript, utilizing latest frameworks (React, Express, Backbone), and Object Oriented design. Experience in team based agile scrum development. Perhaps most importantly, I love what I do, and I am enthusiastic to teach and learn with others.

- 2014 - Current** **Web Developer - Contractor**, New York City, NY
 - Phillips Van-Heusen** - Create a rewards platform. Update existing sites to be responsive /adaptive. Create marketing sites for new brand acquisitions.
(Tech stack - PHP, Javascript, Backbone.js, Wordpress VIP, SQL)
 - DirecTV** - Execute a site-wide re-branding following the companies acquisition by AT&T. Research and implement new site analytics system. Create Customer Help site.
(Tech stack - Javascript, Grunt, ATG, MySQL, PHP, LAMP)
 - Crossbeat** - Create a user-centric artist portfolio showcase site. Architect front-end stack.
(Tech stack - Yeoman, Grunt, Backbone, LoDash, SASS, Handlebars)
- 2012 - 2014** **Web Developer - Levatas**, Palm Beach Gardens, FL
Responsible for the creation and maintenance of software. Most projects were web-based, featuring a Content Management System and responsive components. Projects were constructed using Agile Development practices.
(Tech stack - Dojo, jQuery, Knockout.js, PHP, ASP.net, Wordpress)
- 2010 - 2012** **Freelance Web Developer**
Create and maintain cohesive, functional, seo friendly websites with optional CMS.
(Tech stack - Javascript, Expression Engine, HTML, CSS)
